Soumyaranjan Beura

PYTHON DEVELOPER

I am a recent Computer Science graduate seeking a Python Developer position. Adept in Python with Django and familiar with modern frontend frameworks for building scalable and efficient web applications. Comfortable working with SQL databases, cloud platforms like AWS, and Linux environments. Eager to leverage my skills to contribute to innovative projects and grow as a valuable team member in a forward-thinking tech environment.

WORK EXPERIENCE

Python Full Stack Developer
Pyspider

08/2024 - Present   *Bangalore, India*

PySpiders is a software training organization focused on equipping individuals with the skills needed for the IT industry.

Achievements/Tasks

- I have developed proficiency in both back-end and frontend web development, with a strong foundation in problem-solving, time management with team work . My skill set includes Python and SQL for back-end development, while on the front end, I am adept at HTML5, CSS3, Bootstrap and JS.

PERSONAL PROJECTS

E-commerce Website (04/2025 - Present)
- A list of the various products available for purchase in the store. For the convenience of online shopping, a shopping cart is provided to the user. After the selection of the goods, it is sent for the order confirmation process.
- To build this e-commerce web application, Python, Django framework, and SQLite Database is mandatory.

Restaurant Management System
- It's a Software build for managing a restaurant, where people can browse and order food online easily and book tables.
- I use Python(3.13), Django(5.2), SQLite and frontend technology like html, css, bootstrap and js for responsiveness.
